

A2O Pure Replacement Filters

A2O Pure DWRO®

Powered by Aquaporin Inside®

The DWRO® membrane powered by Aquaporin Inside® is the only drinking water reverse osmosis membrane in the world that uses aquaporins – nature’s own water filters – to purify water. The result is refreshing, high-quality, and great-tasting water that is purified just as nature intended it.

The Aquaporin Inside® DWRO® (drinking water reverse osmosis) membrane filters out 90-99% of all dissolved solids and contaminants in tap water, including PFAS, pesticides, heavy metals, microplastics, bacteria, viruses, dissolved salts, and hardness.

Packaging information

Item no.	40117
Individual packaging inner box dimensions	161×146×368mm
Net weight / Gross weight	1.49kg / 1.66kg
Carton dimensions (9 pcs)	500×500×380 mm
Carton weight	16.3 kg

Technical specifications

Material	Aquaporin Inside® DWRO®
Lifetime	24 months or 7,000 L*

*The limit that is reached first determines when you replace the filter.
